

Northwind Robotics: Company Profile and Ecosystem Report

A sample document for testing schema-constrained entity and relationship extraction

This document is a fictional company report generated to test knowledge graph extraction pipelines against a fixed schema. The schema used for this test defines five entity types — Person, Organization, Location, Product, and Event — and four relationship types — WORKS_AT, LOCATED_IN, CREATED, and OWNS. Every fact below is written so that it maps cleanly onto one of these four relationships. None of the entities described are real.

1. Company Overview

Northwind Robotics is an Organization headquartered in Austin, Texas. Northwind Robotics is located in Austin, Texas, a Location in the United States. The company also operates a second site, an engineering office located in Toronto, Ontario.

Maria Ellison is a Person who works at Northwind Robotics as Chief Executive Officer. Devon Park is a Person who works at Northwind Robotics as Chief Technology Officer. Before joining Northwind Robotics, Devon Park worked at Vantage Autonomy, an Organization located in San Jose, California.

Renata Osei is a Person who works at Northwind Robotics as Director of Hardware Engineering. Sam Whitfield is a Person who works at Northwind Robotics as Engineering Director.

2. Products and Ownership

Northwind Robotics created the Pathfinder 3, a Product in the autonomous mobile robot category. Devon Park is credited as the lead creator of the Pathfinder 3. Northwind Robotics owns the Pathfinder 3 product line, along with all associated patents.

Renata Osei created the SortLine conveyor integration system while working at Northwind Robotics. Northwind Robotics owns SortLine. Sam Whitfield created FleetView, a fleet management software Product, which Northwind Robotics also owns.

Northwind Robotics owns a manufacturing facility located in Waterloo, Ontario, which it acquired along with Cobalt Sensing, a smaller Organization that was previously located in the same city. Cobalt Sensing was originally created by Renata Osei before she joined Northwind Robotics.

Table 1: Products and Their Creators

Product	Created By	Owned By
Pathfinder 3	Devon Park	Northwind Robotics
SortLine	Renata Osei	Northwind Robotics
FleetView	Sam Whitfield	Northwind Robotics

3. Events

Northwind Robotics created the Northwind Robotics Annual Showcase, an Event held each year in Austin, Texas. The Annual Showcase is located in Austin, Texas, at the company's headquarters campus.

In 2022, Northwind Robotics created a second Event, the Pathfinder 3 Launch, which took place in Columbus, Ohio, the same Location where Meridian Logistics, an Organization that distributes the Pathfinder 3, is located. Maria Ellison and Devon Park both spoke at the Pathfinder 3 Launch.

Cascade Ventures, an Organization located in San Francisco, California, created an internal Event called the Cascade Portfolio Summit, which Priya Nadarajah attends every year. Priya Nadarajah works at Cascade Ventures as a partner.

Table 2: Events Summary

Event	Created By	Located In
Northwind Robotics Annual Showcase	Northwind Robotics	Austin, Texas
Pathfinder 3 Launch	Northwind Robotics	Columbus, Ohio
Cascade Portfolio Summit	Cascade Ventures	San Francisco, California

4. Organizations and Locations

Cascade Ventures is an Organization located in San Francisco, California. Cascade Ventures owns a minority stake in Northwind Robotics following its investment. Meridian Logistics is an Organization located in Columbus, Ohio, and owns the exclusive distribution rights for the Pathfinder 3 in North America.

Orion Components is an Organization located in Shenzhen, China. Orion Components created the servo motor components used in the Pathfinder 3, though Northwind Robotics owns the final assembled product.

Table 3: Organizations and Their Locations

Organization	Located In
Northwind Robotics	Austin, Texas
Cascade Ventures	San Francisco, California
Meridian Logistics	Columbus, Ohio
Orion Components	Shenzhen, China
Vantage Autonomy	San Jose, California
Cobalt Sensing	Waterloo, Ontario

5. People Directory

The table below lists each Person, the Organization they work at, and the Location associated with that role, to give the extraction pipeline a dense set of WORKS_AT and LOCATED_IN triples.

Person	Works At	Location
Maria Ellison	Northwind Robotics	Austin, Texas
Devon Park	Northwind Robotics	Austin, Texas
Renata Osei	Northwind Robotics	Waterloo, Ontario
Sam Whitfield	Northwind Robotics	Columbus, Ohio
Priya Nadarajah	Cascade Ventures	San Francisco, California

6. Notes for Testing

This document was written so that nearly every sentence contains at least one explicit WORKS_AT, LOCATED_IN, CREATED, or OWNS relationship between two typed entities. Entities such as Maria Ellison, Devon Park, and Northwind Robotics recur across sections and both prose and tables, which is useful for testing entity resolution alongside relationship extraction against a fixed schema.
